di-factory

AI-Powered Solutions for Modern Insurance

The Insurance Industry Challenge

Digital disruption is reshaping the insurance landscape

- Insurtech startups capturing market share with superior UX
- Legacy systems creating operational bottlenecks
- Customer acquisition costs skyrocketing
- Fraud losses at historic highs across the industry
- Claims processing taking weeks instead of minutes
- Customer churn at all-time highs
- Manual underwriting unable to leverage available data

The reality? Insurers that don't modernize will lose to digital-first competitors within 5 years.

What if Insurance Innovation Was Predictable?

Introducing *di-factory*

Fixed-time, fixed-budget AI solutions for insurance

We're not another IT consultancy with endless implementations. We deliver **working solutions**.

Our Approach: AI-First, Results-Guaranteed

- **Fixed Time Delivery**: 4-week sprints with guaranteed completion
- **Fixed Budget Guarantee**: No surprises, no scope creep, predictable costs
- **AI-Powered Development**: 24/7 development cycles with intelligent automation
- **Insurance-Native**: Solutions designed for P&C, life, health insurance
- **Regulatory Compliant**: Built-in compliance with insurance regulations

AI Solutions for Insurance

Fraud Detection & Prevention

Stop fraud before claims are paid - Real-time claims fraud detection with ML - Network analysis for organized fraud rings - Anomaly detection across claims patterns - Social media and external data integration - Synthetic identity and application fraud detection - Reduce fraud losses by 40-60%

Claims Automation

Transform weeks-long processes into minutes - Automated claims intake and triage - Intelligent document processing and data extraction - Damage assessment with computer vision (auto, property) - Automated claims decisioning for simple cases - Predictive claims cost estimation - Reduce claims processing time by 70%

Intelligent Underwriting

Better risk assessment, faster decisions - Automated underwriting for personal and commercial lines - Alternative data integration for better risk pricing - Real-time risk scoring models - Portfolio optimization and risk concentration management - Explainable AI for regulatory compliance - 50% faster underwriting with improved accuracy

Digital Insurance Solutions

Customer Experience Platforms

Modern insurance experiences customers expect - Self-service portals for policy management - Mobile apps for claims submission and tracking - Quote and bind platforms with instant pricing - Digital onboarding and document upload - Policy comparison and recommendation engines - Reduce customer acquisition costs by 30%

Intelligent Automation

Free your team to focus on complex cases - Customer service chatbots with NLP - Policy administration automation - Renewal processing and retention campaigns - Payment processing and premium collection - Document generation and distribution - Reduce operational costs by 40%

Analytics & Intelligence

Turn data into competitive advantage - Customer lifetime value prediction - Churn prediction and retention modeling - Price optimization and elasticity analysis - Agent performance analytics - Loss ratio forecasting and monitoring - Market intelligence and competitive analysis

Our Core Services for Insurance

1. Business Consulting Companion

From challenge identification to strategic roadmap - Digital maturity assessment - Insurtech competitive analysis - Technology roadmap and prioritization - Vendor evaluation and selection - Business case development with ROI modeling - Change management and adoption strategies

2. MVP Development for Insurance Solutions

Fixed 4-week sprint delivery for working products - Customer portals and mobile applications - Claims management platforms - Quote and policy administration systems - Agent and broker portals - Cloud-native deployment with security - Complete documentation and training

3. ML Models for Insurance Intelligence

Custom AI in 4-week sprint cycles - Fraud detection models (claims, application) - Underwriting risk assessment models - Customer churn and retention prediction - Claims severity and reserve prediction - Price optimization models - Automated damage assessment (computer vision)

Why Insurance Companies Choose *di-factory*

Speed to Market

- **4-week delivery cycles** vs. 18-24 month legacy projects
- Launch MVPs and iterate based on real user feedback
- Outpace insurtech competition

Predictable Investment

- **Fixed-budget guarantee** eliminates overruns
- Transparent pricing with no hidden costs
- Know your ROI before you start

Reduced Risk

- Proven insurance-specific methodologies
- AI-enhanced development for consistent quality
- Regulatory compliance built into every solution
- Security-first architecture

Insurance Expertise

- Solutions designed for insurance workflows
- Understanding of P&C, life, and health insurance
- Integration with major policy admin systems
- Actuarial and underwriting domain knowledge

Success Metrics We Deliver

Fraud Prevention

- 40-60% reduction in fraud losses
- 70% reduction in false positives
- 90%+ fraud detection accuracy
- Significant annual savings for mid-size insurers

Claims Efficiency

- 70% reduction in claims processing time
- 50% decrease in claims handling costs
- 80% automation rate for simple claims
- 40% improvement in customer satisfaction

Underwriting Performance

- 50% faster underwriting decisions
- 30% improvement in risk selection accuracy
- 25% increase in straight-through processing

- 20% improvement in loss ratios

Customer Experience

- 35% reduction in customer churn
- 50% increase in digital engagement
- 30% improvement in NPS scores
- 40% reduction in customer acquisition costs
- 3x increase in cross-sell success

Case Study Framework

Scenario: Regional Auto Insurer Digital Transformation

Challenge: - High claims processing costs and cycle times - Rising fraud losses impacting profitability - Customer churn to digital-first insurtech competitors - Manual underwriting unable to scale

di-factory **Solution:**

Phase 1 - Consulting (4 weeks) - Digital maturity assessment - Opportunity prioritization - Technology roadmap development

Phase 2 - MVP Development (4 weeks) - Mobile app for claims submission - Self-service customer portal - Automated claims intake and triage

Phase 3 - AI Enhancement (4 weeks) - Claims fraud detection model - Damage assessment with computer vision - Customer churn prediction and intervention

Expected Results: - 60% reduction in claims cycle time - 45% decrease in fraud losses - 30% improvement in customer retention - 50% increase in mobile claims submissions - Major annual savings from automation and fraud reduction

Security & Compliance

Insurance-Grade Security

- SOC 2 Type II compliant operations
- End-to-end encryption for sensitive data
- Multi-factor authentication and access controls
- Regular security audits and penetration testing
- Secure development lifecycle

Regulatory Compliance

- NAIC model law alignment
- State insurance department requirements
- Data privacy regulations (GDPR, CCPA)
- Fair lending and non-discrimination compliance
- Explainable AI for underwriting decisions
- Audit trails and model governance

Cloud Infrastructure

- AWS/Azure/GCP with financial services certification
- Multi-region deployment for business continuity
- 99.99% uptime SLA
- Auto-scaling for seasonal demand spikes
- Disaster recovery and backup

Engagement Models

Pilot Project

Prove value with a focused use case - Single solution implementation (4 weeks) - Defined success metrics and ROI measurement - Foundation for broader partnership - **Ideal for:** First engagement, proof of concept

Sprint-Based Development

Continuous value delivery - Rolling 4-week sprints - Prioritized backlog of solutions - Regular demos and stakeholder alignment - **Ideal for:** Ongoing digital transformation

Strategic Partnership

Comprehensive insurance modernization - Dedicated team and resources - Full access to all three service lines - Strategic advisory and innovation roadmap - **Ideal for:** Enterprise-wide transformation programs

Sample Projects for Insurance Carriers

1. Business Consulting Companion

4-week sprints · GO/NO-GO memo your board can sign- Digital maturity assessment across claims, underwriting, distribution - Insurtech competitive teardown — who's eating your lunch, and where - Fraud program benchmark vs. industry leaders - Data readiness diagnostic for AI/ML deployment - Regulatory alignment map (NAIC / CNBV / SUSEP / SUGESE)

2. MVP Development

4-week sprints · production-ready, your team owns the code- Self-service customer portal (policy management + claims submission) - Automated claims intake + triage front-end - Agent/broker quote-bind-renewal workflow - Damage-photo estimator for auto claims (mobile-first) - Digital onboarding + KYC-for-insurance flow

3. ML Models for Insurance Intelligence

2–4 weeks per model · your data, your infra, your team learns alongside- Real-time claims fraud detection - Underwriting risk scoring with alternative data - Customer churn + renewal-risk prediction - Damage assessment (computer vision for auto/property) - Reserve-adequacy + loss-cost forecasting - Coordinated model suite (6–8 weeks · 2–3 models with shared eval harness)

Every engagement is fixed timeline, fixed scope. Code + models + docs delivered to your team. Investment

sized to your data + integration reality — shared on the first call.

Why Now?

The Insurance Industry is at an Inflection Point

- **Insurtech** companies redefining customer expectations
- **Embedded insurance** creating new distribution channels
- **Climate change** requiring better risk models
- **Customer expectations** shaped by Amazon and Netflix
- **AI breakthroughs** enabling dramatic efficiency gains

AI is the Competitive Differentiator

With *di-factory*, you can: - Deploy AI-powered solutions in weeks, not years - Compete with insurtech speed at enterprise scale - Dramatically reduce fraud and operational costs - Improve customer experience and retention

The insurers that embrace AI now will dominate their markets.

Next Steps

Discovery Call

- 30-minute conversation to understand your challenges
- Initial opportunity identification
- Partnership fit assessment

Assessment Proposal

- Tailored scope based on your priorities
- Fixed timeline and budget
- Clear deliverables and success metrics

Pilot Engagement

- 4-week proof of value
- Measurable results
- Foundation for strategic partnership
