MVP Development for Your Digital Business

di-factory | Data Intelligence Factory

Working product in 4 weeks. Fixed time. Fixed budget.

The Problem

- You have a business plan or idea ready to build
- You need a **tech partner** to create the first production version
- Traditional dev shops: **expensive, slow, unpredictable**
- Months of development with uncertain outcomes
- Budget overruns are the norm, not the exception

Our Solution

- **Working MVP in 4 weeks** — not a prototype, a real product
- **Fixed time. Fixed budget.** No surprises.
- First production version ready for **monetization**
- Future roadmap included — know exactly what comes next
- You own everything: code, infrastructure, IP

What We Build

- Digital business applications
- SaaS platforms
- Marketplaces
- AI-integrated solutions
- **Web applications** (responsive, mobile-ready)

First production version for monetization + roadmap for future development

Our Methodology

Agile-Scrum — 4-Week Sprint

WEEK	FOCUS
Week 1	Architecture & Setup
Weeks 2–3	Core Build
Week 4	Deploy, Test & Handoff

Daily standups. Weekly demos. Full transparency.

Week 1: Architecture & Setup

- System design & architecture (3–4 days)
- Data models & database schema
- API contracts & interface definitions
- Project skeleton & boilerplate
- **CI/CD from day 1** — automated from the start
- Development environments configured

Weeks 2–3: Core Build

- Feature development — priority-driven
- Daily standups — stay aligned
- **Weekly demos to you** — see progress, give feedback
- Integration testing throughout
- Code reviews & quality gates
- Continuous deployment to staging

Week 4: Deploy, Test & Handoff

- Production deployment on cloud infrastructure
- QA & end-to-end testing
- Security review & hardening
- Full documentation package
- Knowledge transfer sessions
- **Go-live**

Tech Stack

LAYER	TECHNOLOGY
Backend	Django 5.0 + Django REST Framework
Database	PostgreSQL
Frontend	Bootstrap 5 (responsive)
Infrastructure	AWS (EC2, RDS, S3)
CI/CD	GitHub Actions
Monitoring	CloudWatch + custom dashboards

Adapts to project needs — we use the right tool for the job

Technical Standards

- **CI/CD from day 1** — automated build, test, deploy
- **Environment separation** — dev, staging, production
- **HTTPS & security baseline** — secure by default
- **Monitoring & alerting** — know before your users do
- **Automated backups** — data protection built in
- **Code documentation** — maintainable by any developer
